PENNGUARD™ Block: New Package Design

ErgonArmor is pleased to announce that a new PENNGUARD Block package design will be implemented on future orders of PENNGUARD 55, 28 and 88 Block. This new carton design is part of a successful strategy addressing brand elevation, increased information access and updated regulatory compliance that includes the following added features:

1. ErgonArmor 5-digit part number identification
2. QR code for on-site access to product documentation
3. Up-arrow symbols for increased handling awareness
4. Updated Safe Use Instruction Sheet (SUIS) information for proper declaration of PENNGUARD Block as an article instead of a substance

The following images show the difference between the original PENNGUARD Block carton design on the left and the updated carton design on the right.
